1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

⏱ 5 minutes

PROBLEM 1
How might we help job seekers search for specific job vacancies ?

PROBLEM 2
How might we make the hiring procedure easier to select the best candidate for the job?

PROBLEM 3
How might we make the job search customized

PROBLEM 4
How might we help job seekers search for specific job vacancies ?

Key rules of brainstorming
To run a smooth and productive session
- Stay in topic.
- Encourage wild ideas.
- Defer judgment.
- Listen to others.
- Go for volume.
- If possible, be visual.

PROBLEM 5
How might we proper platform for recruiters to display job openings?

---

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

⏱ 10 minutes

Krishnan V

Saravanan A

- Developing a chatbot to give personalized job recommendations for candidates
- Backup and recovery options for user account and job search history
- Efficient connectivity between job seeker and recruiter
- Fake job offers detection and removal.

---

3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

⏱ 20 minutes

SUPPLEMENTARY FEATURES

- Fake job offers detection and removal.
- Displaying a match score for the candidate to know how much his skills match the job profile
- should provide information about upcoming and ongoing job opening in various sectors.Also regular updates should be provided to the job seekers via email
- Timely reminders to the candidates regarding the deadlines of application process.
- Job Seekers should be notified about the job application deadlines.

---

4 Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

⏱ 20 minutes

Importance
If each of these tasks could get done without any
effort, which would have the most positive impact?

Feasibility
Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)

Sticky notes on grid:
- Timely reminders to the candidates regarding the deadlines of application process.
- should provide information about upcoming and ongoing job opening in various sectors.Also regular updates should be provided to the job seekers via email
- Developing a chatbot to give personalized job recommendations for candidates
- job seekers should be able to search jobs by desired role , salary location and should be faciated with such personalized options that meet their needs!
- Job seekers should be provided with a list of technical courses and certifications to choose. These courses help job seekers to become skilled and industry ready.
- Resume extraction or resume parsing helps in analyzing, storing extracted useful information from the uploaded CV automatically which helps in identifying the best applicants
- Job Seekers are recommended skills to gain and ways to strengthen their resumes based on their preferred job roles.
- Job Seeker should be able to bookmark any number of jobs that he is looking for and apply for it later on.
- Job Seekers should be able to navigate easily through the application (intuitive UI)
- Fake job offers detection and removal.
- Job seekers should be provided with knowledgeable insights to crack interviews.

TIP
Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the H key on the keyboard.
